If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Water transfer line ruptured. The line has been replaced with plastic coated steel.

Describe Area Affected and Cleanup Action Taken.*

Initially 45bbls was released from the ruptured line and we were able to recover 35bbls with a vacuum truck. Skim of produced water traveled from source to pad location measuring area 60' x 60'. Also, 6' x 60' area off of pad. All fluid has been picked up, pad location has been scraped of contaminants. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will submit a remediation work plan for approval prior to any significant remediation work.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
