

G. No hazardous material will be stored at the drillsite.

8. ANCILLARY FACILITIES: None

9. WELL SITE LAYOUT:

A. The well-site and 400' X 400' area have been surveyed and flagged.

B. Dimensions and relative location of the drill pad, pit and equipment are shown on EXHIBIT B.

10. PLANS FOR RESTORATION OF THE SURFACE:

A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing condition as possible.

B. Any unguarded pits containing fluids will be fenced until they are filled.

C. The unused disturbed area will be rehabilitated to Federal Agency requirements and will be accomplished as expeditiously as possible.

11. OTHER INFORMATION:

A. Topography: The regional area slopes west toward the Pecos River, which is about 16 miles west of the drillsite. The drillsite slopes to the north.

B. Soil: The soil is sandy with caliche and chert inclusions.

C. Flora and Fauna: The flora includes mesquite, creosote, sand sage, yucca and various range grasses. Fauna would include small birds, reptiles and rodents.

D. Ponds or Streams: None

E. Residences and Other Structures: None

F. Archaeological, Historical and Other Cultural Sites: Archaeology Survey Consultants, of Roswell, N.M., have made a survey of the proposed new road and wellsite. No significant artifacts were observed.

G. Land Use: The surface is semi-arid rangeland, used primarily for grazing.
