Well No. 13 is located 1630 ft. from S line and 2310 ft. from W line of sec. 35

NE 1/4 SW 1/4 35 17E 27 R1P
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Empire-Abo Eddy New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3639 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well with rotary tools to an approximate total depth of 5850', unless commercial production is obtained at a lesser depth.

We will run approximately 1000' of 9 5/8" O.D. casing and circulate cement to surface.

A 7" O.D. production string will be run if production is found and sufficient cement will be used to bring top of cement above surface string.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
