Artesia, N.M.

2-13-19 57

Southern Union Federal
Well No. **No. 2** is located **660** ft. from **XXXX** line and **660** ft. from **XXXX** line of sec. **34**
S&S Sec. **34** **13 S** **28 E** **NMP**
(¼ Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Wildcat **Eddy** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill this well to a depth not to exceed 2,800 feet to test the Premier formation. We expect to run approximately 300 feet of 3 5/8" casing and if an oil string is needed to run approximately 2,300 feet of 5 1/2" casing cementing same with 100 sacks of cement. We expect to pull the 3 5/8" casing if conditions do not require it to be cemented and left in the well.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
