Detailed account of work done, nature and quantity of materials used and results obtained.

We drilled this well to a total depth of 2,545 without encountering any oil or gas in commercial quantities. We put a 20 ft. plug of cement in the bottom of the hole. Then we put a plug of 10 sacks of cement at the base of the salt (750 ft.). Then we pulled the 8 5/8" casing that had been landed at 364 ft. and put a plug of 10 sacks of cement at the top of the salt (240 ft.). The space between the plugs was filled with mud. We cemented the cellar, cleaned up the location and put up regulation marker.
