12. If well is directionally drilled, give subsurface location and measured and true vertical depths for all markers and zones pertinent to the well.

Well is producing water which is coming from Grayburg sands. It is  
proposed to shut this off by cementing a 5" O.D. 13# J-55 liner from approximately  
2000' to 2600', using approximately 90 sacks of Class "C" cement. A gravel  
and sand seal will be placed at bottom of liner and will be drilled out after  
cementing.
