OIL & GAS  
U.S. GEOLOGICAL SURVEY  
ROSWELL, NEW MEXICO

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Work was commenced on Sept. 13, 1982 to temporarily abandon this inactive water injection well as approved by the MMS on August 10, 1982.

After cleaning out inside of the 3-1/2" OD casing in the well to a depth of 3235', efforts on Sept. 16, 1982 to run a bridge plug to a depth of 3200' were unsuccessful due to the roughness of the casing.

On September 16, 1982, we proposed and obtained verbal approval from Mr. Armando Lopez to permanently plug this well by pumping cement down the 3-1/2" OD casing into the casing perforations from 3300' - 38' and leaving the inside of the 3-1/2" OD casing cemented to the surface.

This work is scheduled for September 17, 1982. The appropriate authorities with the Energy and Minerals Department, Oil & Gas Division have been notified of this proposed work.
