NOTE: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.

If you submit a report on a well, you must state all pertinent details, and give pertinent dates, including estimated date of starting any
proposed work. If you submit a report, you must give subsurface locations and measured and true vertical depths for all markers and zones perti-
nent to this work.

We propose to test this well for production and may desire to place back on
pump for testing.

Well was shut in February, 1960 for economical or mechanical reasons.

After feasibility studies are completed work should be commenced within the
next two years.
