(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Loco Hills, New Mexico, Sept. 11, 19 51

Well No. 4-F is located 1650 ft. from N line and 2310 ft. from W line of sec. 31
S 1/4 NE 1/4 Sec. 31 17-S 30-E NMPM
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Loco Hills Eddy New Mexico
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3566 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On September 3, 1951, we ran 235.12' of 5 1/2" OD 11 1/2 lbs third used seamless casing as production liner hung on Beach-Boone Model #131 lead packoff liner hanger (Total length of liner and hanger = 241.66') from 2663.34 to 2905.00' and cemented with 50 sacks cement.

After allowing to stand cemented for 72 hours we bailed hole down, drilled plug and tested shut-off.

As Shut-off proved complete drilling was resumed.

Cementing was done by Denton Oil Well Cementing Company.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company GENERAL AMERICAN OIL COMPANY OF TEXAS

Address Box 416, Loco Hills, New Mexico
