te names of and expec	DE DE depths to objective sands; she ing points, and	TAILS OF WORK	posed casings; indicate mudding jobs, cem
te names of and expec	DE ted depths to objective sands; she ing points, and	TAILS OF WORK Ow sizes, weights, and lengths of proint all other important proposed work Ton surface to total Casing program to be Approx. Casing	
te names of and expect the Pennsy	DE derrick floor above se DE sted depths to objective sands; she ing points, and rith rotary tools for livenian formation.	TAILS OF WORK ow sizes, weights, and lengths of profital other important proposed work row surface to total casing program to be	depth of around 12,000*
te names of and expect the Pennsy	DE derrick floor above se DE sted depths to objective sands; she ing points, and rith rotary tools for livenian formation.	TAILS OF WORK We sizes, weights, and lengths of production important proposed work The surface to total Casing program to be Approx. Casing 210 3600	depth of around 12,000'
te names of and expect the drilled we the senney hole	DE ted depths to objective sands; she ing points, and rith rotary tools for a formation. Size Casing 13-3/8-00 5-1/2-00	TAILS OF WORK ow sizes, weights, and lengths of profit all other important proposed work casing program to be Approx. Casin, 210 3800 12000	depth of around 12,000° as follows: Point Sacks Same 285 2850 1200
te names of and expect be drilled when the Pennsy be hole	DE ted depths to objective sands; she ing points, and rith rotary tools for livenian formation. Size Casing 13-3/8-00 5-1/2-00	TAILS OF WORK ow sizes, weights, and lengths of profiall other important proposed work rom surface to total casing program to be Approx. Casing 210 3600	depth of around 12,000° as follows: Point Sacks Same 285 2850 1200
te names of and expect be drilled we the Pennsy be hole like	DE ted depths to objective sands; she ing points, and rith rotary tools for livenian formation. Size Casing 13-3/8-00 5-1/2-00	TAILS OF WORK ow sizes, weights, and lengths of profiall other important proposed work rom surface to total casing program to be Approx. Casing 210 3600	depth of around 12,000° as follows: Point Sacks Same 285 2850 1200
te names of and expect be drilled we state the Pennsy pe hole	DE ted depths to objective sands; she ing points, and rith rotary tools for a formation. Size Casing 13-3/8-00 5-1/2-00	TAILS OF WORK ow sizes, weights, and lengths of profiall other important proposed work rom surface to total casing program to be Approx. Casing 210 3600	depth of around 12,000* as follows: Point Sacks Jene 225 2850
te names of and expect be drilled we the Pennsy be hole like	DE ted depths to objective sands; she ing points, and rith rotary tools for livenian formation. Size Casing 13-3/8-00 5-1/2-00	TAILS OF WORK ow sizes, weights, and lengths of profiall other important proposed work rom surface to total casing program to be Approx. Casing 210 3600	depth of around 12,000° as follows: Point Sacks Same 285 2850 1200
te names of and expect be drilled when the Pennsy hole	DE ted depths to objective sands; she ing points, and rith rotary tools for livenian formation. Size Casing 13-3/8-00 5-1/2-00	TAILS OF WORK ow sizes, weights, and lengths of profiall other important proposed work rom surface to total casing program to be Approx. Casing 210 3600	depth of around 12,000° as follows: Point Sacks Same 285 2850 1200
te names of and expect be drilled with the Pennsy to hole life life life to surfi	DE ted depths to objective sands; she ing points, and rith rotary tools for a fine Casing 13-3/8-00 5-1/2-00 cess will be itsed ince on 13-3/8- casing	TAILS OF WORK ow sizes, weights, and lengths of pro i all other important proposed work rom surface to total Casing program to be Approx. Casing 210 3800 12000 A cementing all casing.	depth of around 12,000° as follows: Point Sasks Sens 225 2850 1200 ng and cement will be es
te names of and expect be drilled with the Pennsy to hole like like to surfi	DE ted depths to objective sands; she ing points, and rith rotary tools for a fine Casing 13-3/8-00 5-1/2-00 cess will be itsed ince on 13-3/8- casing	TAILS OF WORK ow sizes, weights, and lengths of pro i all other important proposed work rom surface to total Casing program to be Approx. Casing 210 3800 12000 A cementing all casing.	depth of around 12,000° as follows: Point Sasks Sens 225 2850 1200 ng and cement will be es
te names of and expect be drilled when the senney be hold with the senney below to surfice to surfi	DE ted depths to objective sands; she ing points, and rith rotary tools for a first ign. Size Casing 13-3/8-00 5-1/2-00 cess will be itsed ince on 13-3/8- casing	TAILS OF WORK ow sizes, weights, and lengths of pro i all other important proposed work rom surface to total Casing program to be Approx. Casing 210 3800 12000 A cementing all casing.	depth of around 12,000° as follows: Point Sacks Same 285 2850 1200
te names of and expect be drilled with the Coursey bole with the Surrise production production to surfice the surfice pany Skelly 6	DE ted depths to objective sands; she ing points, and rith rotary tools for livenian formation. Size Casing 13-3/8-00 5-1/2-00 5-1/2-00 cess will be itsed ince on 13-3/8- casi	TAILS OF WORK ow sizes, weights, and lengths of pro i all other important proposed work rom surface to total Casing program to be Approx. Casing 210 3800 12000 A cementing all casing.	depth of around 12,000° as follows: Point Sasks Sens 225 2850 1200 ng and cement will be es
te names of and expect be drilled a st the Pennsy hole liburton product to surfict to surfice to surfice to surfice pany Shelly 6	DE ted depths to objective sands; she ing points, and rith rotary tools for livenian formation. Size Casing 13-3/8-00 5-1/2-00 5-1/2-00 cess will be itsed ince on 13-3/8- casi	TAILS OF WORK ow sizes, weights, and lengths of pro i all other important proposed work rom surface to total casing program to be Approx. Casing 210 3800 12000 A cementing all casi	depth of around 12,000* as follows: Point Sacks Cene 285 2850 1200 Ing and cenent will be commenced.
te names of and expect be drilled with the Country pe hole life life to surfi	DE ted depths to objective sands; she ing points, and rith rotary tools for livenian formation. Size Casing 13-3/8-00 5-1/2-00 5-1/2-00 cess will be itsed ince on 13-3/8- casi	TAILS OF WORK ow sizes, weights, and lengths of pro i all other important proposed work rom surface to total casing program to be Approx. Casing 210 3800 12000 A cementing all casi	depth of around 12,000° as follows: Point Sasks Sens 225 2850 1200 ng and cement will be es
