13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

It is Devon's intent to further evaluate and develop the Seven Rivers interval for additional exploitation potential. Devon requests, that in lieu of permanently plugging this well, that the wellbore be allowed to be temporarily abandoned prior to being utilized for future use as a Seven Rivers producer or injector. Plugging this well would possibly necessitate it being re-drilled at a future date.

Devon Proposes To Temporarily Abandon The Wellbore As Follows:

- Clean out wellbore with bit and scraper.
- RIH with 7" CIBP and set at 1,750'.
- Circulate wellbore full with corrosion inhibited packer fluid.
- Run MIT, pressure test casing to 500 psi for thirty(30) minutes and submit chart to BLM and OCD.

Note: BLM and OCD shall be notified 24 hours prior to MIT. Test shall be witnessed by a representative from each agency.
