Copy 12/21
f. 12/21
m. 12/21

Injection is to be through the five authorized water injection wells, each of which is to be equipped with tubing set in a packer located as near as is practicable to the uppermost perforation, or in the case of the two open-hole completions, to the casing shoe. Injection water shall be treated to prevent corrosion and coupon corrosion tests continuously conducted with result thereof reported quarterly to the Commission.
