**FULL DETAILS OF PROPOSED PLAN OF WORK**

~~FOLLOW INSTRUCTIONS IN THE RULES AND REGULATIONS OF THE COMMISSION~~  
 Run 150' of new 5 1/2" pipe, cemented with 100 sacks of cement, work done by Halliburton Company, cement was allowed to set for 72 hours. Plug was drilled and no water was encountered.

When the cement was drilled out on the above job it was found that some of it had gone down into the shot hole, it apparently did not set very hard, however, in order to clean it up right we think it will be best that we run another shot of probably sixty or seventy quarts in order to be sure that we get all cement out of the pay section. Plan to do this in next day or so.
