	<input checked="" type="checkbox"/> Other <u>Casing Integrity Test</u>	<input type="checkbox"/> Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The production casing will be tested to 500 psi. This test shall be witnessed by a BLM representative.

In lieu of permanently plugging this well, it is requested that a twelve(12) month extension be granted so that the well may remain in a temporarily abandoned status following the proposed mechanical integrity test. It is Devons intent to further evaluate the Seven-Rivers interval for any additional explotation potential. Plugging this well could possibly necessitate it being redrilled at a future date. All lower zones have been plugged back.
