

30-015-20314

Injection is to be through the three authorized water injection wells, each of which is to be equipped with a string of plastic-lined tubing set in a packer located between the Grayburg and San Andres zones. Injection into the San Andres shall be through the tubing while injection into the Grayburg shall be through the casing-tubing annulus. Surface casing in all injection wells shall be set at a minimum of 400 feet beneath the surface with cement circulated.
