If well is directionally drilled, give subsurface location and measured and true vertical depths for all markers and zones pertinent to this work.)

Note: This injection well failed the NMOCD Mechanical Integrity Test ran in March. Anadarko is currently studying this lease to see if we want to continue water flooding, plug and abandon or sale the lease. So at this time, we would like to temporarily abandon the well for a six month period as outlined in the method shown on the attached page. Tim Gum with the NMOCD and I have discussed this procedure and he has no problem with the outlined method for establishing casing integrity to protect the fresh water zone. Anadarko understands that it would lose it's injection permit on this well if it stays TA for a six month period. A decision on what action to take on this well should be made before the six month period is up.
