Re: State 21 #1-P, 21-17-29,  
Eddy County, New Mexico

Dear Mr. Gould:

We are in receipt of your letter of February 19, 1971, with the accompanying forms and reports. Some information, additional to these forms, is required as noted below.

Form C-105, Well Log, is hereby returned for the completion of the Formation Record section on the reverse side of the form. A summary of drill stem tests or other special tests run on the well must be attached to Form C-105.

Form C-122, Multipoint Back Pressure Test for Gas Well, was submitted showing the flow rates run by the decreasing sequence method rather than the increasing sequence method as prescribed in the Commission Manual for Back-Pressure Testing of Natural Gas Wells. When the decreasing sequence method is used, a statement giving the reasons why the use of said method was necessary, together with a copy of the data taken by the increasing sequence method, shall be furnished the Commission. Please submit this information.

Finally, before an allowable may be assigned the well, a notarized tabulation of all deviation tests run on the well must be submitted. This tabulation may be filed with Form C-104 when requesting an allowable.

If there are any questions on this matter, please do not hesitate to call upon me.

Very truly yours,

OIL CONSERVATION COMMISSION

R. L. Stamets
