Attn: Mr. W. A. Gressett

Gentlemen:

In response to a shut-in order dated March 12, 1976 as a result of overproduction of casinghead gas on Empire South Deep Unit Well No. 4, Empire, South Wolfcamp Pool, our letter of February 17, 1976, File: BHS-151-WF, outlined certain tests to be run on the well. Aporoval was granted by telephone by Mr. W. H. Gressett.

These tests have been run and the results are attached, as requested. The well has been shut-in since the tests were run and will remain shut-in until overproduction is made up.

Yours very truly,

JAD/ha
