MULTI-POINT SURFACE USE AND OPERATIONS PLAN

AVON ENERGY CORPORATION  
No.95 Turner "B"  
NWSW Sec.20-17S-31E  
Eddy County, N.M.

LC 029395-B

This plan is submitted with the Application for Permit to Drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to be followed in rehabilitating the surface after completion of the operation so that a complete appraisal can be made of the environmental effects associated with the operation.

1. EXISTING ROADS:

- A. Exhibit "A" is a portion of a road map showing the location of the proposed well as staked. The well is approximately 5.1 miles east of Loco Hills, New Mexico.
- B. Directions: Go east from Loco Hills, N.M. on U.S. 82 a distance of 4.9 miles. Go northeast on lease road for 0.25 mile to drillsite.

2. PLANNED ACCESS ROAD:

- A. None necessary. Well pad is adjacent to waterflood plant.
- B. Cuts and Fills: Existing road will be maintained.
- C. Gates, Cattleguards: Existing cattleguard will be utilized.

3. LOCATION OF EXISTING WELLS:

- A. See Exhibit B

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES:

- A. Temporary production and storage facilities will be located on the well pad.

B. An application for permanent flow lines will be filed at a later date.

5. LOCATION AND TYPE OF WATER SUPPLY:

A. Water for drilling and completion will be obtained from a commercial source and trucked over existing roads.

6. SOURCE OF CONSTRUCTION MATERIALS:

A. If necessary, caliche for surfacing the road and pad will be purchased from a Federal pit located in the SESW Sec.20-17S-31E. Topsoil will be stock piled at the edge of the location for rehabilitation.

7. METHODS OF HANDLING WASTE DISPOSAL:

A. Drill cuttings will be disposed of in the drilling pits.

B. Drilling fluids will be allowed to evaporate in the drilling pits until the pits are dry.

C. Water produced during test will be disposed of in the drilling pits. Oil produced during test will be stored in test tanks until sold.

D. Current laws and regulations pertaining to the disposal of human waste will be complied with.

E. Trash, waste paper, garbage, and junk will be buried in a separate trash pit and covered with a minimum of 24 inches of dirt. All waste material will be contained to prevent scattering by the wind. Location of the trash pit is shown on Exhibit "C".

F. All trash and debris will be buried or removed from the wellsite within 30 days after finishing drilling and/or completion operations.

8. ANCILLARY FACILITIES:

A. None required

9. WELL SITE LAYOUT:

A. The wellsite, surrounded by a 400' X 400' area has been surveyed and flagged.

- B. Dimensions and relative location of the drill pad and pit are shown on Exhibit C.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. If the well is non-productive the disturbed area will be rehabilitated to surface owner requirements and will be accomplished as expeditiously as possible.

11. OTHER INFORMATION:

- A. Topography: The wellsite and access road are located in the Querecho Plains. The project area drains to the southwest toward Cedar Lake. Construction of the drill pad will require leveling of a portion of an abandoned gravel pit.
- B. Soil: The surface soil is fine sand with caliche and chert inclusions.
- C. Flora and Fauna: Vegetation consists of mesquite, sagebrush, yucca, and various weeds and grasses. Ground cover is about 15%. Wildlife in the area is that typical of semi-arid desert land, such as coyotes, rodents, reptiles and birds.
- D. Ponds or Streams: None. A dry arroyo is located on the east side of the drillsite.
- E. Residences and Other Structures: The drillsite is adjacent to the waterflood power plant.
- F. Archaeological, Historical and Other Cultural Sites: A review by Archaeological Services Consultants determined that no cultural sites will be endangered.
- G. Land Use: The surface is used for cattle grazing.
- H. Surface Ownership: The drillsite and access road are on-lease. The grazing lessee is Williams & Son Cattle Company, Box 30, Maljamar, New Mexico.
