12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The subject well was drilled as a replacement well. Devon proposes to selectively perforate the Grayburg-San Andres from 2800' to 3660', acidize w/15% NEFE as needed & convert to water injection. This will allow a more effective & efficient flood pattern. It is estimated the proposed work will start 3-1-95.
