We request that this well be classified as Temporarily Abandoned. The East Millman Unit is an active waterflood project with an on going infill drilling program and plans for conversion of existing wells to additional water injection wells. This well has beneficial use as a producing well or a future water injection well subsequent to the infill drilling program which will be completed over the next 3 years. Depending upon the success of the infill drilling program, well No. 4-4 will be reactivated as a producer or converted to a water injection well sometime during the next 3 years.

See attached well data, pressure chart and the procedure for Temporarily Abandon Status.

Classified as Temporarily Abandoned DEC 2005

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
