August 13th, 1957

**Shugart "A"**

Well No. 3 is located 1980 ft. from N line and 1980 ft. from E line of sec. 10

SW/NE Sec. 10      18S      31E      NMPM  
(¼ Sec. and Sec. No.)      (Twp.)      (Range)      (Meridian)

North Shugart      Eddy      New Mexico  
(Field)      (County or Subdivision)      (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We will set approximately 800 feet of 8 5/8" casing and cement with not less than 100 sacks of cement. We will then drill to approximately 4250 feet and set 5 1/2" casing and cement with not less than 1200 sacks of cement. We will then perforate the Queen section and complete the well through perforations in the zone between 3,300 and 3,700 feet.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
