IT IS THEREFORE ORDERED:

WFX 459

12-29-77

That the applicant, Shenandoah Oil Corporation, be and the same is hereby authorized to inject water into the Penrose formation through plastic-lined tubing set in a packer at approximately 3343 feet in the following described well for purposes of secondary recovery, to wit:

Shugart "D" Well No. 10 located in Unit G of Section 30, Township 18 South, Range 31 East, NMPM, Eddy County, New Mexico.

IT IS FURTHER ORDERED:

That the operator shall take all steps necessary to ensure that the injected water enters only the proposed injection interval and is not permitted to escape to other formations or onto the surface.

That the casing-tubing annulus shall be loaded with an inert fluid and equipped with a pressure gauge at the surface or left open to the atmosphere to facilitate detection of leakage in the casing, tubing, or packer.

That the injection well or system shall be equipped with a pop-off valve or device which will limit the wellhead pressure to a maximum of 682 pounds per square inch; provided however that the Secretary-Director of the Commission may administratively authorize a pressure limitation in excess of the above upon the operator's establishing that such higher pressure will not result in fracturing of confining strata.

That the operator shall notify the supervisor of the Commission's Artesia District Office before injection is commenced through said well;
