DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The well will be drilled with cable tools to the regular pay zone in the Yates formation at about **500** feet.

Surface water will be cased off at about **400** feet.

Production string will be cemented before drilling the pay zone.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
