Dear Sir:

I visited your State lease on March 4, 1957, Wells No. 1 & 2 and found fence around burning pit, or, water pit down in places Cows had been inside. There is a dead Cow in auxillary pit, Oil around your tank and no fence around tank. No signs on wells, you will have to move your tank 150 feet away from well or build firewall around it.

We don't have a C-103 on your well No. 2 stateing what size pipe and how much cement. We also need C-105, Well Log.

We will be down probably Friday and would like to see you.
