MayfieldOctober 2, 1957Well No. 2 is located 660 ft. from ~~2310~~ line and 2310 ft. from (E) line of sec. 33SW 1/4 sec. 33
(1/4 Sec. and Sec. No.)20 S
(Twp.)28 E
(Range)N.M.P.M.
(Meridian)Salader-Yates Pool (Extension)
(Field)Eddy
(County or Subdivision)New Mexico
(State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is planned to drill an 8-3/4" rotary hole to an approximate depth of 150' where 7" surface casing will be set to shut off casing sand and any surface water which may be encountered. 4-1/4" rotary hole will then be drilled to test the Yates sand at approximately 700'. If oil is encountered, 5 1/2" oil string will be cemented. If test results in a dry hole, surface pipe will be pulled and well will be plugged in accordance with 1953 regulations.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
