(State or Territory)

The elevation of the derrick floor above sea level is 3198 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Hole was drilled to 666 feet and found no shows of oil gas or water in the Yates formation.

5½ inch pipe which was cemented at 608 was shot off at 160 feet after filling hole back to bottom of pipe with cement.

hole was filled with heavy mud to 160 feet and a cement plug placed below the surface water.

7 inch pipe which was set at 78 feet was then shot off at 50 feet and the hole filled with heavy mud to near the surface where a marker was set in concrete.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
