NOTICE OF INTENTION TO PULL OR ALTER CASING		SUPPLEMENTARY WELL HISTORY	
NOTICE OF INTENTION TO ABANDON WELL			

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

July 14, 1948

Well No. 1 is located 1652 ft. from S line and 2526 ft. from E line of sec. 1
Sec. 1 20 S. 29 E. N. M. P. M.
(4 Sec. and 36 Sec. No.) (Twp.) (Range) (Meridian)
McLean McLean New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate casing joints, cementing points, and all other important proposed work)

It is planned to drill 11" rotary hole to a depth of approximately 400' where 8 5/8" casing will be cemented on top of the salt with 50 sacks cement. 7 7/8" rotary hole will then be drilled through the salt section to a depth of about 1300', where 7" casing will be set and the hole continued with cable tools, to test the Yates Section. If no oil is found, it is expected that water will be encountered at a depth of approximately 1650' and if so, the hole will be plugged according to U. S. G. S. specifications.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
