Federal "N" Lease

Well No. 3-28 is located 330 ft. from N line and 1980 ft. from E line of sec. 28

34/4 34/4 Sec. 28 20-5 30-E N.H.P.M.  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)

Don Hernandez Edley New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3352 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

I plan to drill a 1735' Yates line test, using cable tools all the way.

8-5/8" surface casing will be run to the first salt at approximately 500' and cemented with 125 sacks.

A 7" oil string will be cemented at approximately 1660' in hard sand with sufficient cement to obtain circulation.

All casing will be run and cemented under procedures approved by the U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
