

Attachment C-101, Gulf Oil Corporation, Hackberry Hills Unit well # 2, Section 7, 22-S, 26-E, Eddy County, New Mexico.

This is an unorthodox location. The property on which this well is located lies within the Hackberry Hills Unit, consisting of 13,920.38 acres, which was approved by both the State of New Mexico and the United States Geological Survey, with the approval dates being February 13, 1961 and February 27, 1961, respectively, and is surrounded by property within this Unit. It is necessary to drill the well at this location due to the rough terrain encountered on top of the mountain. This is the same base Unit and there are no offset operators involved.
