Re: #17 Big Eddy Unit well
Section 2-21S-29E
Eddy County, New Mexico

Dear Sir:

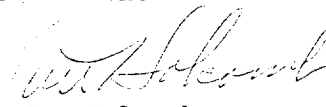

We have just completed our expunction well as a Morrow gas producer. This well had an initial potential of some 9 million cubic feet gas from approximately 32 feet of Morrow Sandstone at a depth of 12,870 feet.

We, of course, are not now in a position to further our negotiations toward giving this well to the U.S.G.S. as a water observation well.

If, at some future date, we would be in a position to assist you in your program, please do not hesitate to contact us at that time. Cities Service Oil Company is always glad to cooperate with your agency.

Very truly yours,

CITIES SERVICE OIL COMPANY
