During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned.

is true and complete to the best of my know

I hereby certify that the above informatio

ledge and belief.

Senior Engineer

December 5, 1984

(Date)

No well will be assigned an allowable greater than the amount of oil produced on the official test.

Gas volumes must be reported in MCF measured at a pressure base of 15,025 psia and a temperature of 60° F. Specific gravity base

Rule 301 and appropriate pool rules.

Mall original and one copy of this report to the district office of the New Mexico Oil Conservation Commission in accordance with

Report casing pressure in lieu of tubing pressure for any well producing through casing.

will be 0.60.

increased allowables when authorized by the Commission.
