17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

This well has been drilled to a T.D. of 11,315' in shale and it is now proposed to plug back and set and cement 5-1/2" OD 17# and 20# casing @ 10,589' w/700 sacks of cement. It was originally proposed to drill to a T.D. of 11,275' and set and cement 5-1/2" OD 17# and 20# casing at this depth. This new casing program is due to the Morrow Zone being dry. This proposed casing program has been orally approved by Mr. Jim Knauf with the U.S.G.S. office at Artesia, New Mexico.
