

SURFACE USE CHECK LIST
YATES FEDERAL #4
SEC. 18-20S-29E
EDDY COUNTY, NEW MEXICO

1. Existing roads are indicated in green on the attached map No. 1
2. Our planned access will require approximately 1320' of new road as indicated in red on the attached map No. 1
3. All existing wells and our planned location are indicated on the attached map No. 1
4. No laterals are planned
5. The TB or surface equipment to serve this well will be located on the drilling pad. A planned 3" gas pipeline to tie in to existing gathering lines is indicated in blue on the attached map No. 2
6. Drilling water will be purchased from existing commercial supplies and will be trucked in to the location
7. Waste disposal will be handled by appropriate approved means at such time as it becomes necessary. No need for waste disposal is currently anticipated
8. No camps are planned
9. No airstrips will be constructed. If necessary, the Carlsbad Municipal Airport, approximately 20 miles south of this location, will be used
10. Location layout is attached
11. All pits used for drilling will be levelled after drying out
