Santa Fe, New Mexico 87501

ATTENTION: Mr. A. L. Porter, Jr.
Secretary-Director

REFERENCE: Nonstandard Gas Proration Unit
Lots 3,4,5,6,11,12,13 & 14
Section 4-T21S-R26E
Eddy County, New Mexico

Gentlemen:

Morris R. Antweil respectfully requests the granting of administrative approval to a nonstandard gas proration and spacing unit comprising the 297.4 acres being Lots 3, 4, 5, 6, 11, 12, 13 and 14 of Section 4-T21S-R26E, N.M.P.M., Eddy County, New Mexico, to be dedicated to our No. 1 Western Reserves Federal to be drilled in Lot 11.

The unorthodox size of the requested unit is necessitated by the variation of the legal subdivisions of the U. S. Public Lands Surveys. Lots 3 and 4 to be dedicated to the proposed well contain only 28.65 and 28.75 acres, respectively; therefore, the total acreage available to the gas proration unit is 297.4 acres. The attached copy of the C-102 being filed for the proposed well shows the well location and the acreage to be dedicated. The proposed well will be drilled to 11,000 feet to test the Strawn and Morrow formations with the Strawn, comparable to the Fackel No. 1 El Paso Federal in Section 3 to the east, being the principle objective.

Provision for the grant of administrative approval of a nonstandard gas proration unit under the above conditions is contained in Rule 104-D-II of the Rules and Regulations of the Oil Conservation Commission. Your favorable consideration of our request will be appreciated.

Respectfully,

MORRIS R. ANTWEIL

R. M. Williams
