Re: Injectivity Test
Government "D" No. 4 Well
Eddy County, New Mexico

Dear Sir:

Reference is made to your request of July 22, 1986, for authorization to conduct a 60 day Delaware formation injectivity test on your Government "D" No. 4 Well, a proposed salt water disposal well. This request is based on information presented by Mobil to the Division at a meeting held on July 22, 1986. As per Division Rules and Regulations, this application for water disposal will be set for the Examiner Hearing on August 20, 1986. Pending approval of the application at the hearing, Mobil will be granted a temporary test period for this well.

You are therefore authorized to conduct a 60 day Delaware formation injectivity test on the Government "D" No. 4 Well located in Section 1, Township 21 South, Range 27 East, NMPM, Eddy County, New Mexico, subject to the following conditions:

- (1) At no time during this test period will the injection pressure exceed .2 psi. per foot of depth to the uppermost perforation unless approval has been given by the Division's Artesia district office.
- (2) Should the application for disposal well be denied by the Division at the hearing on August 20, 1986, Mobil will cease all injection operations into the well after receipt of the Division order.

- (3) Prior to commencing injection test operations into the well, the proposed disposal zone shall be swab tested for a period of time to be determined after consultation with the Division.
- (4) All such testing operations shall comply with all Division Rules and Regulations regarding injection operations.

Sincerely

A handwritten signature in dark ink, appearing to read 'R. L. Stamets', with a long horizontal flourish extending to the right.
