If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Request authority to retain this well as temporarily shut in as of 10-9-85. This well has not been completed. Operations should be suspended 60-90 days, and well will be completed at a future date.

The Government "D" #7 well is being threatened by offset drainage and in order to prevent drainage we must move in on the well. Therefore, due to the time required to complete the #8 well operations are being suspended in order that the #7 well can be completed and drainage prevented.
