

ABSTRACT

New Mexico Archaeological Services, Inc., representing M.W. PETROLEUM CORPORATION, undertook a Class III survey of fee surface land with federal minerals scheduled to be impacted by the construction of a drill location and its associated access road. Field work was conducted under clear, sunny conditions with moderate southwesterly winds during mid-morning. The proposed location will measure 400 X 400 ft (actual area surveyed 4.44 acres). The access road will measure 100 X 2200 ft (actual area surveyed 5.05 acres). Total surveyed acreage 9.49 acres. They will be situated in Section 13, T22S, R23E, NMPM, Eddy County, New Mexico. No cultural properties were recorded during these surveys.
