Re: Gas Well Gas Commingling

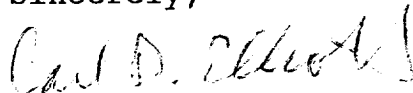

MW Petroleum Corporation proposes to connect the HOC Federal No. 1, the HOC Federal No. 2, the Smith Federal No. 1 and the Smith Federal Gas Com. No. 2 into a common sales line. The gas well gas from the four wells will be commingled upstream of the sales meter. The production from these wells can go to either a Marathon sales meter or a Gas Company of New Mexico sales meter, both of which are located off lease from these wells. Allocation meters for each well that will indicate the individual well production will be set up as shown on the attached schematics.

Therefore, MW Petroleum Corporation respectfully requests approval of the proposed gas meter installations.

If further information is required, please contact Carl Elliott at (915) 683-6511.

Send correspondence to: MW Petroleum Corporation
3300 N. A St., Suite 8220
Midland, Texas 79705

Sincerely,

Carl D. Elliott
MW Petroleum Corporation
