13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

In order to return this well to production, Kerr-McGee Oil & Gas Onshore LLC is requesting BLM approval to perform the following work:

Attempt clean out, run production liner, install flowlines, and put on pump.  
History: Original completion was an open hole completion. Subsequent acid frac stimulation resulted in fill due to collapsed formation. An attempt to cleanout fill was partially successful, but resulted in leaving 83' fill in hole with 45' fish on top. The well was shut-in pending further evaluation due to concerns over additional fill entry into the wellbore.  
Expected production 1,000 MCF/d, 400 BWPd.

14. I hereby certify that the foregoing is true and correct
