

- B. Any pits containing fluids will be fenced until they are filled. The NMOCD pit netting rules will be followed. The reserve pits will be reclaimed by deep burying the drill cuttings. The pit area will be leveled and contoured to conform to the surrounding area. A stockpile of topsoil from the location construction will be evenly distributed over the disturbed area. Re-vegetation procedures will comply with BLM standards.
- C. Upon abandonment of the well, surface restoration will be in accordance with the surface owner requirements and will be accomplished as expediently as possible.

11. **Surface Ownership**

The surface for the well site locations is on BLM surface and minerals and Leased by Corrales Livestock Corp., Hope, New Mexico.

12. **Additional Information**

- A. Topography: Hilly with canyons. Location is in a relatively flat area.
- B. Vegetation is a desert scub, which includes little leaf sumac, bear grass, lechuguilla, prickly pear, cholla, yucca, and mixed grasses.
- C. The area is stony and rocky with loamy soils over limestone. The soil is interspersed with limestone cobbles. Limestone outcrops are to the north and south. Soils appear to be shallow throughout the area.
- D. Primary use of the land is livestock grazing and accessing producing wells.
- E. There are no dwellings in the vicinity.
- F. An archaeological survey has been prepared by Donald Clifton report # 424 and has been sent to your office.
- G. The selected dirt contractor will be furnished with an approved copy of the Surface Use Plan and any additional stipulations prior to beginning and work.

13. **Operator's Representatives**
