

## MULTI-POINT SURFACE USE AND OPERATION PLAN

#1, Indian "A", 9201 JV-P

Page 4

- C. If the proposed well is non-productive, all rehabilitation and/or vegetation requirements of the BLM will be complied with and will be accomplished as expeditiously as possible.
- D. All disturbed areas will be seeded on the contour at a depth of one-half Inch using the seed mixture required by the BLM.
- E. Seeding will be completed after September 15<sup>th</sup> and prior to November 15<sup>th</sup> before freeze up or as early as possible the following spring to take advantage of available ground moisture.
- F. Newly constructed access road will be recontoured, disked, and seeded as specified above. All rehabilitation work, including seeding, will be completed as specified by the BLM, or sooner if conditions permit.

### 11. Surface Topography

- A. Surface ownership is 4 TK & Cattle Company, Box 41, Welch, TX 79377, Attn: Wayne Boles, (806) 489-7415.
- B. Mineral ownership is Federal.
- C. The wellsite and access route are located to the east of the Loafer Draw as shown on Exhibit –A–, Topographic map of the area. The area is fairly flat with sandy loam soil underlain with limestone.
- D. There are no houses or buildings within one mile of the drillsite.
- E. Signs identifying and locating our well will be maintained at the drillsite and principle entrance, commencing with the spudding of the well.
- F. An Archaeological Survey has been prepared by Geo-Marine and is being provided to the Carlsbad office.

### 12. Operator's Representative:

- A. The field representative who is responsible for assuring compliance with the approved Surface Use Plan is:

Drilling Manager:

Mr. L. G. Johnson
