

MULTI POINT SURFACE USE AND OPERATIONS PLAN

FUEL PRODUCTS, INC.
Aspen Federal, Well No. 1
1980' FNL & 990' FWL, Sec. 4-T24S-R26E
Eddy County, New Mexico
Lease No. : NM-90514
(Re-entry Exploratory Well)

This plan is submitted with the Application for Permit to Drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction activities and operations plan, to be followed in rehabilitating the surface after completion of the operation so that a complete appraisal can be made of the environmental effects associated with the operations.

1. EXISTING ROADS:

- A. Exhibit "A" is a portion of a BLM color quad map showing the location of the well as staked. The well site location is approximately 10 miles southwest of Carlsbad, New Mexico. Traveling Southwest of Carlsbad on U.S. Highway 62/180 there will be approximately 10 miles of paved highway.
- B. Directions: Travel southwest from Carlsbad, NM on U.S. Highway 62/180 for approximately 10.5 miles from the turnoff of Highway 285 and .4 mile south of MM #23 to the old access road on the right (marked with an "H" brace in the fence) to the dry hole marker for the Allied Chemical Fed # 1 well site 700 feet to the west (right).

2. PLANNED ACCESS ROAD:

- A. Length and Width: The existing access road will be upgraded to a 15 foot width and will run to the west from the highway for approximately 500 feet to the southeast corner of the old pad.
- B. Construction: The existing access road will be repaired by grading and topping with compacted caliche presently on the road and will be properly drained, as needed.
- C. Turnouts: None required.
- D. Culverts: None.
- E. Cuts and Fills: None.
- F. Gates, Cattle guards: One cattle guard will be required.
- G. Off Lease R/W: None required.

3. LOCATION OF EXISTING WELLS:

- A. Existing wells within a two mile radius are shown on Exhibit "C".

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES:

- A. There are no production facilities on the lease at this time.
- B. If the well proves to be commercial, the necessary production facilities, gas separation-process equipment and tank battery will be installed on the drilling pad.
