Attn: Jay M. Gabbard, P. E.

Administrative Order NSL-3771

Dear Mr. Gabbard:

Reference is made to your application dated February 21, 1997 for an unorthodox gas well location in the South Carlsbad-Morrow Gas Pool for the proposed Happy Valley Federal "4" Well No. 22. Said well to be drilled 1650 feet from the North line and 1450 feet from the West line (Unit F) of Section 4, Township 23 South, Range 26 East, NMPM, Eddy County, New Mexico.

Lots 3 and 4, the S/2 NW/4, and the SW/4 (W/2 equivalent) of said Section 4 being a standard 321.89-acre gas spacing and proration unit for said pool is to be dedicated to said well.

The geologic interpretation submitted with this application indicates that a well drilled at the proposed unorthodox gas well location will be at a more favorable geologic position within the Morrow formation than a well drilled at a location considered to be standard.

The application has been duly filed under the provisions of Rule 104.F of the General Rules and Regulations of the New Mexico Oil Conservation Division ("Division"), revised by Division Order No. R-10533, issued by the Oil Conservation Commission in Case 11,351 on January 18, 1996.

By the authority granted me under the provisions of RULE 2(d) of the "General Rules for the Prorated Gas Pools of New Mexico/Special Rules and Regulations for the South Carlsbad-Morrow Gas Pool", as promulgated by Division Order No. R-8170, as amended, and Division General Rule 104.F(2), the above-described unorthodox gas well location is hereby approved.

Sincerely,

William J. LeMay
Director
