Dear Ms. Bennington and Mr. Johnson,

Applications to drill for the above referenced wells are enclosed for your review. These wells lie within 1 mile of the WIPP withdraw area and are inside the R-111-P Potash area. The James Ranch Unit Well # 67 drilling application was approved on February 10th 1994 and has since then expired. Per terms of the Joint Powers Agreement between the Energy Minerals and Natural Resources Department, the DOE and other agencies these applications are provided so that you may have the opportunity to develop and submit any comments thereon.

Please feel free to call me if you have any questions about this matter or if I can provide any further additional information.

Yours truly,

Bryan G. Arrant
