RE: Proposed Wells in James Ranch Federal Unit
Section 36, T23S-R30E (State Lease No. U-3229)
Section 1, T23S-R30E (Fed Lease No. NM 02887-D, NM 02884-B)
JRU Nos. 31, 32, 34, 63, 67, and 80.
Hobby County, New Mexico

Dear Mr. Cutilin:

IMC Potash Carlsbad Potash Company has received your notice that Bass Enterprises Production Company intends to the above referenced wells. IMC Potash has no objections to Bass drilling wells JRU Well No. 31, JRU Well No. 32, JRU Well No. 34, and JRU Well No. 63 to depths no deeper than the base of the Delaware formation at the stated locations. Based on the best available information, the locations of the five mentioned wells will not interfere with the development of our potash resources.

IMC Potash does object to the proposed locations for JRU Well No. 67 and JRU Well No. 80. The location given for Well No. 67, with a projected final depth in the Delaware formation, is within 1/4 mile of where we expect to mine in the future. If this well could be moved at least 150 feet to the Southeast, the impact on potash recovery would be greatly diminished. The location given for Well No. 80, with a projected final depth in the Wolfcamp formation is within 1/2 mile of where we expect to mine. If Well No. 80 could be moved to a location at least 150 feet to the West, the impact on potash recovery would also greatly diminish.

The above considerations are based on the best available information at this time; as more information becomes available our estimates of the extent of the potash resources in the area may change. Therefore, please consider the "objections offered" and "no objection offered" to the well locations to be valid for one year only. If you are still considering a well location that a potash operator has or has not objected to, more than one year prior, notify us again at that time so we can make the decision based on current information.

IMC Potash submits this letter in lieu of the forms requested.

Sincerely,

John Percell
Chief Mine Engineer
