13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

ATTENTION: LARRY BRAY

Bass Enterprises Production Co. requests a waiver for the 10,000 psi BOP for our proposed Poker Lake Unit #185. We recommend running the BLM standard 10,000 psi BOP with an exception to the annular preventer which will have a 5000 psi rating. The exception is requested due to availability & our experience in the area.

The proposed 14,500' Morrow development well directly offsets our PLU #153, which was spudded on 12/7/00 & is completed in the Mid Morrow, perms 14,053-216'. The proposed well & PLU #153 are in the same section approximately 2150' apart. The Remuda Basin State Com #1, the first offset to PLU #153 approximately 3600' NNW, was spudded on 6/10/01 & is now completed in the Morrow B & C Sands, perms 13,863-14,050'. No well control problems were experienced on either of the two recently

14. I hereby certify that the foregoing is true and correct.
