

1. EXISTING ROADS:

- A.** Exhibit "A" is a portion of a highway map showing southeast New Mexico. The proposed well is approximately 10 miles southeast of Carlsbad, New Mexico. A circle drawn encompasses the proposed site.
- B.** Exhibit "B" shows existing pertinent roads and surface topography in the vicinity of the proposed well site. To go to the site, go south from Carlsbad, New Mexico on U.S. 285. Near Loving, turn left on S.H. 31. Go east on S.H. 31 5.3 miles, turn left on County blacktop road (Refinery Rd.). Go northwest 3.4 miles on blacktop road, turn right onto pipeline dirt road. Continue northeast on dirt road 0.7 mile, then right to staked location. The surface location of the proposed well is on Federal land, Sec. 26 T-22-S R-28-E.

2. PLANNED ACCESS ROAD:

- A.** For the most part, existing roads will be used for access to the proposed wellsite. A pipeline dirt road currently exists from Refinery Road, running to the northeast. Once the pipeline road enters Section 26 (refer to Exhibit B), then an access road must be built to the right in order to reach the staked well site. An archaeological clearance will be secured on the proposed access road concurrent to the study of the wellsite. The proposed access road will be built as per BLM stipulations. All travel into the well site will occur on dirt roads situated on Federal lands.

3. LOCATION OF EXISTING WELLS:

- A.** Existing wells in the immediate area are shown on Exhibit "B".

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES:

- A.** Necessary production facilities for this well will be located on the well pad. Storage tanks will be isolated with an earthen firewall to prevent any loss of liquids off the pad.

5. LOCATION AND TYPE OF WATER SUPPLY:

- A.** A water well will not be drilled. Water necessary for drilling operations will be purchased and trucked to the well site.
