The 6 wells shown below are more-recent unallocated Pictured Cliffs wells in the 9-section produced in the 1980s and 1990s, which were completed significantly later than the 1950s-era wells, and were first producers in their respective quarter-sections. The rates are an average from the first six months of production, since the Federal 13-41 has never had any Pictured Cliffs production in that quarter-section and similar IPs are expected.

Interest Owners

Subject: Notice of Intent to Apply for Downhole Commingling  
Fullerton Federal 13 #41  
Unit A, Sec 13, 27N, R11W

XTO Energy Inc is submitting an application to the New Mexico Oil Conservation Division (NMOCD) to downhole commingle production from the West Kutz Pictured Cliffs and the Basin Fruitland Coal pools in the Fullerton Federal 13 #41. Commingling of these pools will minimize operating costs, add reserves and improve economics of the well.

The proposed allocation percentages for each pool are as follows:

Pictured Cliffs	Oil: 100%	Gas: 75%	Water: 100%
Fruitland Coal	Oil: 0%	Gas: 25%	Water: 0%

NMOCD requires all interest owners be notified of intent to downhole commingle if ownership is different between zones. If you need additional information or have any questions, I may be contacted at (505) 333-3204. If you have any objections to our application, please contact me within twenty (20) days of the date of this letter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Lorri D. Bingham', is written over a printed name and title.

Lorri D. Bingham
