## **Closure Report**

Site Description		
9Site Name:	Federal 26 CTB	
Company:	Oxy USA Inc.	
Legal Description:	U/L H, Section 26, T22S, R31E	
County:	Lea County, NM	
GPS Coordinates:	N 32.36437 W-103.74173	

Release Data		
Date of Release:	11/8/18	
Type of Release:	Produced water	
Source of Release:	Fatigue of water transfer pump inside lined berm	
/Volume of Release:	20 bbls	
Volume Recovered:	19 bbls	

Remediation Specifications			
Remediation Parameters:		completed by removing all contaminated material ned facility. The liner was inspected for integrity and cellent condition.	
Remediation Activities:	February 2019		
Plan Sent to OCD:	n/a	n/a	
OCD Approval of Plan:	n/a	n/a	
Plan Sent to SLO:	n/a	n/a	
SLO Approval of Plan:	n/a	n/a	

Supporting Documentation		
Initial C-141	Signed 01/29/2019	
Final C-141	Signed 02/13/2019	
Site Diagram	February 2019	
Pictures	Liner integrity photos	

### **Request for Closure**

Based on the completion of the remediation plan, BBC International, Inc. requests closure approval from NMOCD.

Cliff Brunson, President, BBC International, Inc.

02/14/2019

# State of New Mexico Oil Conservation Division

Incident ID		*

Facility ID		*
Application ID		##\.

#### Site Assessment/Characterization

This information must be provided to the appropriate district office no later than 90 days after the release discovery date.

What is the shallowest depth to groundwater beneath the area affected by the release?	175 (ft bgs)			
Did this release impact groundwater or surface water?	☐ Yes ■ No			
Are the lateral extents of the release within 300 feet of a continuously flowing watercourse or any other significant watercourse?	☐ Yes ■ No			
Are the lateral extents of the release within 200 feet of any lakebed, sinkhole, or playa lake (measured from the ordinary high-water mark)?	☐ Yes ■ No			
Are the lateral extents of the release within 300 feet of an occupied permanent residence, school, hospital, institution, or church?	, Yes 🔳 No			
Are the lateral extents of the release within 500 horizontal feet of a spring or a private domestic fresh water well used by less than five households for domestic or stock watering purposes?	I Yes ■ No			
Are the lateral extents of the release within 1000 feet of any other fresh water well or spring?	☐ Yes ■ No			
Are the lateral extents of the release within incorporated municipal boundaries or within a defined municipal fresh water well field?	☐ Yes ■ No			
Are the lateral extents of the release within 300 feet of a wetland?	☐ Yes ■ No			
Are the lateral extents of the release overlying a subsurface mine?	☐ Yes ■ No			
Are the lateral extents of the release overlying an unstable area such as karst geology?	☐ Yes ■ No			
Are the lateral extents of the release within a 100-year floodplain?	☐ Yes ■ No			
Did the release impact areas not on an exploration, development, production, or storage site?	☐ Yes ■ No			
Attach a comprehensive report (electronic submittals in .pdf format are preferred) demonstrating the lateral and vertical extents of soil contamination associated with the release have been determined. Refer to 19.15.29.11 NMAC for specifics.				
Characterization Report Checklist: Each of the following items must be included in the report.				
<ul> <li>Scaled site map showing impacted area, surface features, subsurface features, delineation points, and monitoring wells.</li> <li>Field data</li> <li>Data table of soil contaminant concentration data</li> <li>Depth to water determination</li> </ul>				
Determination of water sources and significant watercourses within ½-mile of the lateral extents of the release  Boring or excavation logs Photographs including date and GIS information  Topographic/Aerial maps	·			
Laboratory data including chain of custody				

If the site characterization report does not include completed efforts at remediation of the release, the report must include a proposed remediation plan. That plan must include the estimated volume of material to be remediated, the proposed remediation technique, proposed sampling plan and methods, anticipated timelines for beginning and completing the remediation. The closure criteria for a release are contained in Table 1 of 19.15.29.12 NMAC, however, use of the table is modified by site- and release-specific parameters.

### **Remediation Plan**

Remediation Plan Checklist: Each of the following	g items must be included in the plan.
■ Detailed description of proposed remediation tec	
Scaled sitemap with GPS coordinates showing different Estimated volume of material to be remediated	elineation points
Closure criteria is to Table 1 specifications subje	ect to 19.15,29.12(C)(4) NMAC
	diation plan timeline is more than 90 days OCD approval is required)
100-11	74 100 100 100 100 100 100 100 100 100 10
Deferral Requests Only: Each of the following ite.	ms must be confirmed as part of any request for deferral of remediation.
Contamination must be in areas immediately und deconstruction.	ler or around production equipment where remediation could cause a major facility
Extents of contamination must be fully delineated	d.
Contamination does not cause an imminent risk t	to human health, the environment, or groundwater.
which may endanger public health or the environmentability should their operations have failed to adequate	ort and/or file certain release notifications and perform corrective actions for releases at. The acceptance of a C-141 report by the OCD does not relieve the operator of ately investigate and remediate contamination that pose a threat to groundwater, addition, OCD acceptance of a C-141 report does not relieve the operator of state, or local laws and/or regulations.

#### Closure

The responsible party must attach information demonstrating they have complied with all applicable closure requirements and any conditions or directives of the OCD. This demonstration should be in the form of a comprehensive report (electronic submittals in .pdf format are preferred) including a scaled site map, sampling diagrams, relevant field notes, photographs of any excavation prior to backfilling, laboratory data including chain of custody documents of final sampling, and a narrative of the remedial activities. Refer to 19.15,29.12 NMAC.

Closure Report Attachment Checklist: Each of the following items must be included in the closure report.			
■ A scaled site and sampling diagram as described in 19.15.29.11 NMAC			
Photographs of the remediated site prior to backfill or photos of the liner integrity if applicable (Note: appropriate OCD District office must be notified 2 days prior to liner inspection)			
Laboratory analyses of final sampling (Note: appropriate ODC District office must be notified 2 days prior to final sampling)			
■ Description of remediation activities			
and regulations all operators as may endanger public health or should their operations have fa human health or the environme compliance with any other fed restore, reclaim, and re-vegetar	re required to report and/or file certa the environment. The acceptance of ailed to adequately investigate and reent. In addition, OCD acceptance of leral, state, or local laws and/or regulate the impacted surface area to the commacd including notification to the Catrich	lete to the best of my knowledge and understand that pursuant to OCD ain release notifications and perform corrective actions for releases what a C-141 report by the OCD does not relieve the operator of liability emediate contamination that pose a threat to groundwater, surface water a C-141 report does not relieve the operator of responsibility for lations. The responsible party acknowledges they must substantially enditions that existed prior to the release or their final land use in OCD when reclamation and re-vegetation are complete.
